Invitation to the Ubiquitous Environment Control System® (UECS) Consortium

Yes, I choose UECS!

The Ubiquitous Environment Control System® Consortium is a community of researchers, engineers, business owners, salespeople, administrators, growers, and consumers. Our group performs a variety of functions aimed at further developing this easy-to-use, high performance system—including managing and authorizing regulations and trademarks, supporting research and development for devices and software, and exchanging information with and providing consultation for users who have introduced UECS.
